

SUPERWOOL® HTTM HIGH-TEMPERATURE INSULATION MATERIALS

Superwool® HTTM products are a range of versatile high-temperature insulation products which are safe to use and retain their outstanding properties even at elevated temperatures.

Historically, fiber-based insulation products have often been accompanied by health issues associated with their use. However, Superwool® HTTM has been developed as a safe-to-use alternative material with low bio persistence, meaning that any fibers which may be breathed in are rapidly removed by natural processes within the body.

In addition to very low thermal conductivity, Superwool[®] HTTM products have a classification temperature of 1300°C, good strength, low shrinkage and offer thermal stability.

APPLICATIONS OF SUPERWOOL® HT™ HIGH-TEMPERATURE INSULATION MATERIALS

- > Kiln linings
- > Heat treatment furnace linings
- > Ladle & trough covers
- > Heat containment
- > Boiler walls

The low shrinkage properties of Superwool[®] HT[™] products avoid the creation of hot spots and reduce time spent on costly maintenance operations.

The excellent insulating properties of Superwool[®] HT[™] ensure energy savings are maximized, whilst using minimal space.

This photograph is a representation of the insulating properties of Superwool[®] HT [™]. Under no circumstances should you attempt to recreate this or any similar demonstration.

Goodfellow Ceramic and Glass Division are able to offer Superwool[®] HTTM materials in a number of different forms. The following are readily available sizes, but other sizes can also be supplied on request:

Paper: 2mm and 4mm thick Blanket: 6mm, 13mm, 25mm thick

Board: 10mm and 25mm thick Bulk fibre: 1kg lots upwards

Mastic: 300ml cartridge

Applications for Superwool[®] HT[™] products can often be found in the following industries:

> Glass > Ceramics > Foundries

> Petrochemical > Civil construction

Superwool[®] HT^m is an alkaline earth silicate (AES) fibre. Its CAS number is 436 083-99-7. Superwool is a trademark of The Morgan Crucible Company plc.

Superwool[®] HT™ Blanket

Typical Properties

Classification Temperature	1300°C
Colour	white
Density	128 kg/m₃
Tensile strength (EN 1094-1)	75 kPa

High-Temperature Performance

Permanent linear shrinkage (EN-1094-1) after 24	<2 %
hours isothermal heating at 1260°C	

Thermal conductivity (ASTM C201) at mean temperature of:

200°C	0.04 W/m.K
400°C	0.08 W/m.K
600°C	0.14 W/m.K
800°C	0.23 W/m.K
1000°C	0.34 W/m.K
1200°C	0.48 W/m.K

Chemical Composition

SiO ₂	70-80 %
CaO + MgO	18-25 %
Others	<3 %

Superwool® HT™ Paper

Typical Properties

Classification Temperature	1300°C	
Properties Measured at Ambient Conditions (23°C/50% Relative Humidity)		
Colour	white	
Density (average)	210 kg/m₃	
Tensile strength (EN 1094-1)	>0.45 MPa	

High-Temperature Performance

Loss on ignition	8 %
Linear shrinkage at 1260°C	<2 %

Thermal conductivity (ASTM C201) at mean temperature of:

200°C	0.04 W/m.K
400°C	0.07 W/m.K
600°C	0.10 W/m.K
800°C	0.14 W/m.K
1000°C	0.19 W/m.K
1200°C	0.25 W/m.K

Chemical Composition

SiO ₂	70-80 %
CaO + MgO	18-25 %
Others	<3 %

Superwool[®] HT™ Board

Typical Properties

Classification Temperature	1300°C	
Properties Measured at Ambient Conditions (23°C/50% Relative Humidity)*		
Colour	white/tan	
Density	350 kg/m₃	
Modulus of rupture	1.2 MPa	
Compressive stress at 10% deformation	0.3 MPa	

High-Temperature Performance

Loss on ignition after 2 hours heating at 800°C	<5 %
Permanent linear shrinkage (ASTM C-201) after 24 hours isothermal heating at 1200°C	<1.5 %
Permanent thickness shrinkage (ASTM C-201) after 24 hours isothermal heating at 1200°C	<3.0 %

Thermal conductivity (ASTM C-201) at mean temperature of:

200°C	0.05 W/m.K
400°C	0.08 W/m.K
600°C	0.11 W/m.K
800°C	0.15 W/m.K
1000°C	0.20 W/m.K
1200°C	0.26 W/m.K

Superwool[®] HT™ Mastic

Typical Properties

Classification Temperature (of base fibre)	1300°C	
Properties Measured at Ambient Conditions (23°C/50% Relative Humidity)		
Colour	white	
Density as supplied	1420 kg/m₃	
dried	730 kg/m₃	
Modulus of rupture (BS 1902) (dried)	1.5 MPa	
Linear drying shrinkage	<1 %	

High-Temperature Performance

Permanent linear shrinkage (ENV 1094-7) after 24	1.0%
hours isothermal heating at 1100°C

Superwool[®] HT™ Bulk

Typical Properties

Classification Temperature	1300°C	
Colour	white	
Specific gravity	2.50 g/cm₃	
Beaker value*		
Bulk code 70 unchopped	650 ml	
Coarse chopped G25	200 ml	
Fine chopped G08	130 ml	
*Beaker value is a measure of the fibre length using settling test method. The		

^{*}Beaker value is a measure of the fibre length using settling test method. The larger the beaker value the longer the fibre.

High-Temperature Performance

Specific heat capacity at 1090°C	1.22 kJ/kg.K
----------------------------------	--------------

Chemical Composition

SiO ₂	70-80 %
CaO + MgO	18-25 %
Others	<3 %
