

Goodfellow Introduces Comprehensive Custom Manufacturing Services

Huntingdon, UK ... 3rd February 2015 ... Goodfellow, a leading supplier of small to medium quantities of high-quality metals, ceramics and other materials for research and product design, has expanded its offering to include custom manufacturing and finishing of components to customers' precise specifications.

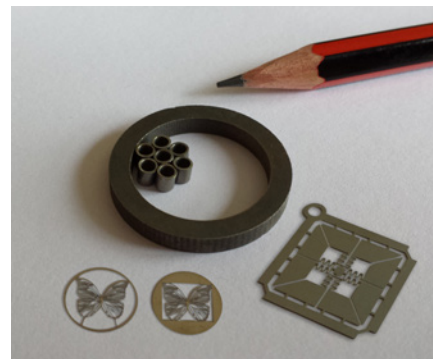

Customers using this service no longer need to coordinate multiple suppliers to get the exact metal, ceramic or polymer component they require. Goodfellow can help customers select, if desired, the most suitable material(s) for the application, then manufacture the desired component to customer drawings and finish with custom coatings, surface treatments, etc.

Services include but are not limited to precision machining, cutting, turning, rolling, drilling, grinding, and milling; forming, bending, and shaping; coating with almost any metal or polymer to a defined thickness; and surface treatment, mechanical polishing and chemical polishing.

Those interested in this service are invited to send Goodfellow a drawing to receive a no-obligation assessment and cost estimate. The company can be contacted at info@goodfellow.com or 0800 731 4653 (UK freephone) or +44 1480 424800.

About Goodfellow

For more than 45 years, the Goodfellow name has been synonymous with small quantities of high-quality metals, polymers, ceramics and other materials that meet the research, development, and specialised production requirements of science and industry worldwide. Standard products can be found online at the comprehensive Goodfellow Catalogue (www.goodfellow.com). Custom products and materials in larger quantities are available upon request at info@goodfellow.com.
