

Ultra-High-Purity Precious Metals Available in a Range of Forms

Huntingdon (UK) ... 16 November 2016 ... Goodfellow, a leading supplier of metals and materials for science and industry, offers ultra-high-purity precious metals in small quantities for research and product design. Gold, silver and the platinum group of metals (platinum, palladium, rhodium, ruthenium, iridium and osmium) are available in a wide range of forms*, including

Foil	Tube	Powder
Wire	Mesh	Lump
Rod	Sputtering target	Single crystal

Goodfellow can supply precious metals in a wide range of forms, most in stock and available for quick delivery.

Applications are wide-ranging and include use in the fields of medicine and electronics as well as for catalysts, solar cells, crucibles, mirrors and optics. In addition to pure metals, Goodfellow can supply both standard and custom alloys.

For more information about precious metals from Goodfellow, call 0800 731 4653 (UK) or +44 (0) 1480 424 800, email info@goodfellow.com, or visit the [Goodfellow Catalogue](#).

**Not all metals are available in all forms.*

About Goodfellow

*Goodfellow is a leading supplier of metals, polymers, ceramics and other materials to meet the needs of science and industry worldwide. The company specialises in supplying small quantities (a few grammes to a few kilos) of metals and materials for research, prototype development and specialised manufacturing applications. Standard products can be found online at the comprehensive **Goodfellow Catalogue**. Custom products and materials in larger quantities are available upon request at info@goodfellow.com.*
